PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AI & ML with strong full-stack development experience (React.js, Node.js, MongoDB). Solved 650+ DSA problems with a LeetCode rating of 1779 (max), reflecting strong problem-solving, critical thinking and algorithmic thinking. Built scalable web applications with real-time features and optimized backend performance. Seeking software engineering roles to develop high-performance, scalable systems

EDUCATION

Bachelor of Technology (Computer Science Engineering – AI & ML)	2023 – 2027
JECRC University GPA: 9.23	Jaipur, Rajasthan
Senior Secondary School , Swami Keshvanand Sikshan Sansthan Sr. Sec. Sch Percentage: 77.20	2022
Secondary School , Laxmangarh Public School Percentage: 95.67	2020

SKILLS

Languages:	C++, Java, Python, JavaScript
Frameworks:	React.js, Node.js, Pandas, NumPy, Matplotlib, TensorFlow
AI Skills:	Machine Learning, Neural Networks, Deep Learning
Databases:	MySQL, MongoDB
Core Skills:	Operating Systems, DBMS, Computer Networks
Soft Skills:	Good Communication, Leadership, Teamwork, Adaptability

WORK EXPERIENCE

Samatrix Consulting Private Limited	Jun 2025 – Jul 2025
Data Analyst Intern	
- Analysed 5K+ records using Python (NumPy, Matplotlib), performing data cleaning and EDA to uncover trends and patterns - Built KPI dashboards to visualize key metrics, reducing manual analysis effort by ~30% - Applied statistical techniques to generate actionable insights for data-driven decision-making - Delivered multiple analysis reports within a 4-week internship under strict timelines	

PROJECTS

ScholarBoard - Student Performance & Placement Platform LINK	Nov 2025 – May 2026
Tech: React.js, Node.js, Express.js, MongoDB, Firebase Auth, Tailwind CSS	
- Developed a role-based full-stack platform with 3 user roles, managing 1K+ student records (simulated dataset) - Designed and implemented 12+ REST APIs using Node.js and MongoDB for academic, attendance, and placement data - Implemented secure authentication and RBAC using Firebase Auth across multiple dashboards - Optimized database queries using indexing, improving data retrieval performance by ~20%	
FutureMedia – A Social Media Platform LINK	Jan 2026 – May 2026
Tech: MERN Stack, WebSockets, JWT, MongoDB Atlas	
- Built a full-stack MERN social media application with modular React components and scalable backend architecture - Developed 10+ REST APIs and integrated JWT authentication for secure user sessions - Implemented real-time communication using WebSockets, supporting 50+ concurrent users (simulated) - Improved API performance by ~15–20% through efficient query handling and backend optimization	

ACHIEVEMENTS

- ServiceNow CSA and CAD Certified
- Solved 650+ DSA problems across [LeetCode](#) (500+, Max Rating: 1779), [GeeksforGeeks](#) (100+), and [Code360](#) (70+, Rating: 1506)
- Winner – CodeHunt (JECRC University) | Ranked 1st in a three-stage coding & logic competition
- Finalist – CodeAthon 1.0 (JECRC University) | Cleared multiple contest rounds and solved 2 medium-level DSA problems in the final round
